

Reinstall Windows XP on DELL Premium and Basic PC's

You received a Operating System disc and a Drivers & Utilities disc with your DELL PC.

1. Turn the computer on and when you get to the desktop insert the green Operating System disc.
2. Click on **Install Windows XP**.
3. **Select New Installation (Advanced)**. Click **Next**.
4. Accept the agreement and click **Next**.
5. Enter the Product Key from the top of your computer, then click **Next**.
6. Click **Next**.
7. **Select Yes, download the updated setup files (Advanced)**. Click **Next**.
8. After a short period of time the computer will reboot.
9. A blue screen will appear, which says *Welcome to Setup*.
10. Press **enter** to set up Windows XP.
11. On the next screen, press **ESC** to *continue installing a fresh copy of Windows XP without re-pairing*.
12. The next screen will show existing partitions on the hard drive.
13. Use the down arrow to **select the C: partition**.
14. Press **enter** to set up Windows XP on this partition.
15. On the warning screen, press **C** to continue.
16. Press **L** to delete the existing folder and Windows will now install the setup files.
17. The PC will reboot and then install Windows. (This will take some time.)
18. On the *Regional and Language Options* window, select **Next**.
19. Type in your name or Manager, then click **Next**.
20. On the *Computer Name and Administrator Password* window click **Next**.
21. Ensure the date and time are correct, then click **Next**.
22. A display settings warning will appear; click **OK**.
23. Click **OK**.
24. *Welcome to Microsoft Windows* will appear, click **Next**.
25. **Select Help protect my PC by turning on Automatic updates now**, and click **Next**.
26. Type in your name or the name you want to appear on the start menu.
27. Click **Next**. Then click **Finish**. Windows will start.
28. After the computer boots up click on **Start>My Computer>**double-click on **XP_PRO_SP2 (:D)** in the CD/DVD drive.
29. Click on **Perform Additional Tasks**.
30. Click on **Install .NET Framework**. The setup will load.
31. *Check the box to accept the agreement* and then click on **Install Now**.
32. It will take a few minutes to install.
33. Click on the **Restart Now** button when it pops up.
34. The computer will restart and setup will resume.
35. Click on the **Done** button when the setup finishes installing.
36. Take out the operating systems disk.
